SwarmOne
The Autonomous AI Infra Platform

WHO WE ARE:

SwarmOne, the autonomous AI infra platform that automates setup, optimization, and scaling, letting businesses focus on innovation with seamless integration and maximum efficiency at any scale - the way enterprise AI was meant to be.

THE PROBLEM:

The world's shackled to primitive GPU orchestration – like Slurm, RunAI, fragile Kubernetes setups and endless guesswork - leading to inefficiencies, long setup times, and costly cycles between data scientists and DevOps.
These hurdles slow down AI projects, wasting time and resources.

THE SOLUTION:

SwarmOne handles the entire AI setup process autonomously. From real-time workload analysis to autonomous scheduling, optimizing hardware usage for maximum efficiency. SwarmOne seamlessly runs on-prem, in the Cloud, or in hybrid environments, enabling instant scaling without friction or trial and error - just AI, unleashed.

Your private IDE
1-click install on any GPU node

SwarmOne Platform
Autonomous AI
LifeCycle Ops

Continuously Optimized Infrastructure
2 lines of code from your IDE

No DevOps. No MLOps. No SecOps. No FinOps.

Your Competitive Advantage:

Max Efficiency, Instant ROI – Zero infra delays, zero DevOps loops. Achieve ROI in under a month.

**No-code Studio included –** Empower non-technical users run million models

**Predictable pricing –** $15K–$25K/year per 8xGPU node. Fully scalable.

Lightning-fast setup to Production guaranteed - SwarmOne gets you to production in minutes. 80+ hours of work? Gone. Unstoppable Momentum.

Reclaim 100% of data scientists' time

90%+ cost savings up to $200K per engineer/year

87% of AI projects stall

50% of enterprises stuck on infra hurdles

Ready to run AI at the speed of thought?
